### SUBSCRIPTION INFORMATION

Discrete Applied Mathematics (ISSN 0166-218X) is published in 7 volumes (21 issues) a year. The subscription price for 1993 (Vols. 41-47) is Dfl. 1925.00 + Dfl. 231.00 p.h. = Dfl. 2156.00 (US\$ 1297.90). (Combined subscription: Discrete Applied Mathematics and Discrete Mathematics (Vols. 109-120): Dfl. 4465.00 + Dfl. 627.00 p.h. = Dfl. 5092.00 (US\$ 3065.40).) The Dutch guilder price is definitive. The US dollar price is subject to exchange-rate fluctuations and is given only as a guide. Subscriptions are accepted on a prepaid basis only, unless different terms have been previously agreed upon. Subscription orders can be entered only by calendar year (Jan.-Dec.) and should be sent to Elsevier Science Publishers, Journal Department, P.O. Box 211, 1000 AE Amsterdam, Netherlands, telephone 31.20.5803642, fax 31.20.5803598, or to your usual subscription agent. Postage & handling charges include surface delivery except to the following countries where air delivery via SAL (Surface Air Lifted) mail is ensured: Argentina, Australia, Brazil, Canada, Hong Kong, India, Israel, Malaysia, Mexico, New Zealand, Pakistan, PR China, Singapore, South Africa, South Korea, Taiwan, Thailand, USA. For Japan air delivery (SAL) requires 25% additional charge of the normal postage and handling charge. For all other countries airmail rates are available upon request. Claims for missing issues must be made within six months of our publication (mailing) date, otherwise such claims cannot be honoured free of charge.

*Special regulations for authors*—Upon acceptance of an article by the journal, the author(s) will be asked to transfer copyright of the article to the Publisher. This transfer will ensure the widest possible dissemination of information.

*Special regulations for readers in the USA*—This journal has been registered with the Copyright Clearance Center, Inc. Consent is given for copying of articles for personal or internal use, or for the personal use of specific clients. This consent is given on the condition that the copier pays through the Center the per-copy fee stated in the code on the first page of each article for copying beyond that permitted by Sections 107 or 108 of the US Copyright Law. The appropriate fee should be forwarded with a copy of the first page of the article to the Copyright Clearance Center, Inc., 27 Congress Street, Salem, MA 01970, USA. If no code appears in an article, the author has not given broad consent to copy and permission to copy must be obtained directly from the author. All articles published prior to 1981 may be copied for a per-copy fee of US \$ 2.25, also payable through the Center. This consent does not extend to other kinds of copying such as for general distribution, resale, advertising and promotion purposes, or for creating new collective works. Special written permission must be obtained from the Publisher for such copying.

No responsibility is assumed by the Publisher for any injury and/or damage to persons or property as a matter of products liability, negligence or otherwise, or from any use or operation of any methods, products, instructions or ideas contained in the material herein.

Although all advertising material is expected to conform to ethical standards, inclusion in this publication does not constitute a guarantee or endorsement of the quality or value of such product or of the claims made of it by its manufacturer.

## SCOPE OF THE JOURNAL

The aim of this journal is to bring together research papers in different areas of discrete applicable mathematics and applications of it. Among the areas to be covered by DAM we mention: discrete optimization, network theory, switching and automata theory, utility theory and preference structures, mathematical biology, mathematical sociology, mathematical chemistry, game theory, scheduling theory, etc. Algorithms and complexity studies will be covered in the journal.

Contributions presented to the journal can be research papers, short notes, surveys, and possibly research problems. The "Communications" section will be devoted to the fastest possible publication of the brief outlines of recent research results, the detailed presentation of which might be submitted for possible publication in DAM or elsewhere. The journal will also publish a limited number of book announcements, as well as proceedings of conferences.

## INSTRUCTIONS TO AUTHORS

All contributions should be written in English or French, should have an abstract in English (as well as one in French if the paper is written in French), and – with the exception of Communications – should be sent in triplicate to Nelly Segal, Publications Assistant, RUTCOR – Rutgers Center for Operations Research, P.O. Box 5062, New Brunswick, NJ 08903-5062, USA. The authors are requested to put their mailing address on the manuscript.

Upon acceptance of an article, the author(s) will be asked to transfer copyright of the article to the Publisher. This transfer will ensure the widest possible dissemination of information.

No page charge is made.

Manuscripts submitted for the Communications section, having at most 5 typewritten pages, should be sent to a member of the editorial board in triplicate. Detailed proofs do not have to be included, but results must be accompanied at least by rough outlines of their proofs. Subsequent publication in this journal or elsewhere of the full text of a research report, the outline of which has been published in the Communications section of our journal, is not excluded. Every effort shall be made for the fastest possible publication of Communications. Consequently the presentation of these manuscripts should be very clear.

Please make sure that the paper is submitted in its final form. Corrections in the proofstage, other than of printer's errors, should be avoided; costs arising from such extra corrections will be charged to the authors.

The manuscript should be prepared for publication in accordance with instructions given in the "Instructions to Authors" (available from the Publisher) details of which are condensed below:

1. The manuscript must be typed on one side of the paper in double spacing with wide margins. A duplicate copy should be retained by the author.
2. All mathematical symbols which are not typewritten should be listed separately.
3. Footnotes, which should be kept to a minimum and should be brief, must be numbered consecutively and typed on a separate sheet in the same format as the main text.
4. Special care should be given to the preparation of the drawings for figures and diagrams. Except for a reduction in size, they will appear in the final printing in exactly the same form as they were submitted by the author; normally they will not be redrawn by the printer. In order to make a photographic reproduction possible, all drawings should be on separate sheets, with wide margins, drawn large size, in India ink, and carefully lettered. Exceptions are diagrams only containing formulae and a small number of single straight lines (or arrows); these can be typeset by the printer.
5. References should be listed alphabetically, in the same way as the following examples:

*For a book:* W.K. Chen, Applied Graph Theory (North-Holland, Amsterdam, 1971).

*For a paper in a journal:* J. Rhodes and B.R. Tilson, Lower bounds for complexity of finite semi-groups, J. Pure Appl. Algebra 1 (1971) 79–95.

*For a paper in a contributed volume:* M.O. Rabin, Weakly definable relations and special automata, in: Y. Bar-Hillel, ed., Mathematical Logic and Foundations of Set Theory (North-Holland, Amsterdam, 1970) 1–23.

*For an unpublished paper:* D. Allen, Relations between the local and global structure of finite semi-groups, Ph. D. Thesis, University of California, Berkeley, CA (1968).

## AUTHORS' BENEFITS

1. 50 reprints per contribution free of charge.
2. 30% discount on all Elsevier Science Publishers books (order forms will be sent together with the proofs).

*US mailing notice – Discrete Applied Mathematics* (0166-218X) is published monthly by Elsevier Science Publishers (Molenwerf 1, Postbus 211, 1000 AE Amsterdam). Annual subscription price in the USA US\$ 1297.90 (subject to change), including air speed delivery. Application to mail at second class postage rate is pending at Jamaica, NY 11431.

USA POSTMASTERS: Send address changes to Discrete Applied Mathematics, Publication Expediting, Inc., 200 Meacham Avenue, Elmont, NY 11003. Air freight and mailing in the USA by Publication Expediting.

# COMPUTATIONAL GEOMETRY

## Theory and Applications

**Editors-in-Chief:** J.-R. Sack, *School of Computer Science, Carleton University, Ottawa, Ontario, Canada K1S 5B6* and J. Urrutia, *Department of Computer Science, University of Ottawa, Ottawa, Ontario, Canada K1N 6N5*

**Honorary Editors:** P. Erdős and F.P. Preparata

**Editorial Board:** S.G. Akl, *Queen's University, Canada*, M. Atallah, *Purdue University, USA*, D. Avis, *McGill University, Canada*, J.D. Boissonnat, *INRIA, France*, B. Chazelle, *Princeton University, USA*, K. Clarkson, *AT&T Bell Laboratories, Murray Hill, USA*, L. Devroye, *McGill University, Canada*, D. Dobkin, *Princeton University, USA*, H. Edelsbrunner, *University of Illinois at Urbana-Champaign, USA*, J.E. Goodman, *City College, CUNY, USA*, R. Graham, *AT&T Bell Laboratories, Murray Hill, USA*, L. Guibas, *Digital Systems Research Center, Palo Alto, USA*, H. Imai, *Tokyo University, Japan*, D.G. Kirkpatrick, *University of British Columbia, Canada*, D.T. Lee, *Northwestern University, USA*, K. Mehlhorn, *Universität des Saarlandes, Germany*, M. Overmars, *Utrecht University, The Netherlands*, J. Pach, *Hungarian Academy of Sciences, Hungary*, R. Pollack, *New York University, USA*, R. Seidel, *University of California at Berkeley, USA*, M. Sharir, *Tel Aviv University, Israel*, P.G. Spirakis, *Computer Technology Institute, Patras, Greece*, S. Suri, *Bell Communications Research, Morristown, USA*, N.M. Thalmann, *Université de Genève, Switzerland*, G. Toussaint, *McGill University, Canada*, E. Welzl, *Freie Universität Berlin, Germany*, F. Yao, *Xerox Corporation, Palo Alto, USA*, C. Yap, *New York University, USA* and J. Zaks, *University of Haifa, Israel*

**Audience:** Theoretical Computer Scientists, Discrete Mathematicians, Researchers in Computer Graphics, Pattern Recognition and Image Processing.

### AIMS AND SCOPE

**Computational Geometry** is a forum for research in theoretical and applied aspects of computational geometry. The journal publishes fundamental research in all areas of the subject, as well as

disseminating information on the applications, techniques, and use of computational geometry. **Computational Geometry** publishes articles on the design and analysis of geometric algorithms. All aspects of computational geometry are covered, including the numerical, graph theoretical and combinatorial aspects. Also welcomed are computational geometry solutions to fundamental problems arising in computer graphics, pattern recognition, robotics, image processing, CAD-CAM, VLSI design and geographical information systems. **Computational Geometry** features a special section containing open problems and concise reports on implementations of computational geometry tools.

### ABSTRACTED/INDEXED IN:

ACM Computing Reviews, Cambridge Scientific Abstracts, Computer Abstracts, Engineering Index/Compendex, Geo Abstracts, INSPEC Information Services, International Abstracts in Operations Research, Mathematical Reviews, Zentralblatt für Mathematik.

Commenced publication 1991

1993: Volume 3 (in 6 issues)

Subscription price:

Dfl. 280.00 / US \$ 168.50

Postage and handling:

Dfl. 33.00 / US \$ 20.00

Total price: Dfl. 313.00 / US \$ 188.50

ISSN 0925-7721

*Dutch Guilder (Dfl.) prices are definitive.*
